## PROFITEER DON'T

## President Butler of Columbia University Says Saving Only Remedy

San Francisco.—President Nicholas Murray Butler of Columbia University, speaking here before the Commercial Club, said, "punishing profiteers is a good thing, but it won't reduce the cost of living. If we had all their hoarded goods it would do little good."

"Only the operation of inexorable economic laws can bring us back to tolerable conditions. The remedy is to save, to practice public economy and private thrift. We must save and invest in productive industry. Borrowing for non-productive reasons mean bankruptcy."

In the opinion of the best economists in the United States the peoples' greatest weapon against high prices is the Government's Thrift and War Savings Stamps. Every family should have a budget, just as every successful business has a budget. The first thing on that budget should be the amount to be saved from the weekly or monthly income—not the amount to be spent. Make what you save govern the amount you spend, not the amount you spend govern the amount you save.

War Savings Stamps bring 4 per cent interest, compounded every three months. Hit high prices below the belt by investing in United States securities. The dollar you save today will be worth twice as much five years from now.

## HAND GRENADES USED 500 YEARS AGO IN BATTLE

## Government Giving Away Bombs Intended for Doughboys' Use

Washington.—Hand grenades, which the Government will shortly make available to thrifty individuals through banks and trust companies as souvenirs of the Great War, date back five centuries as war weapons. They were known to have been used in 1427 at the siege of the Fortress of Casamaggiore, on the River Po, the defenders using a glass bottle filled with powder.

The term "grenadiere" grew out of the training of the best qualified among the soldiers of Louis XIV. In 1765, to hurl these grenades. In English history, as well, the grenadiers are found from the Seventeenth Century on. The Russo-Japanese war, however, developed the grenade into the effective weapon. It proved in the Great War. Jam tins, tomato cans, and other metal receptacles were salvaged from scrap heaps and filled with powder. These were the immediate forerunners of the modern cast iron, corrugated TNT grenades, known as the Mills Defensive Bomb, which caused so much destruction when hurled into a German trench or dugout. It is the Mills grenade with the TNT removed that the Government is putting out now as savings banks.

Ask any bank how to get one. You don't have to pay a cent for it.

## NOW AND THEN

What is a dollar? Foolish question—you say? Not at all these days of H. C. L. and profiteering. Certainly a dollar isn't what it was ten years ago. It isn't what it will be five years from now.

A dollar is what you can get for it in beans, butterfiles, or bunk—no more or no less. A dollar wouldn't be worth anything if you couldn't get anything for it.

Ten years ago you bought, we'll say, bunk at one dollar a share. Now bunk costs two dollars a share. That doesn't mean that bunk has doubled in value. It means that your dollar is worth half what it was ten years ago.

This is, therefore, not the time to spend your dollars. They will bring you only half what they are worth. This is the time to save them.

They will bring more later on. That is the history of dollars. Values run in cycles. As sure as you are living five years from now a dollar will be worth more than it is now, probably twice as much. So when you save a dollar now you are really saving two dollars. Treat dollars as you would any other commodity. Buy them when they are cheap.

Stick every dollar you can into War Savings Stamps now. Carrying 4 per cent interest compounded quarterly, a War Savings Stamp bought this month for \$4.20, will be worth five dollars January 1, 1924. By 1924 the dollar will be worth twice as much as it is so you will really have ten dollars for the \$4.19.
